Subject: Objectives for October 15 meeting

Hi Lindsay,

Attached please find a document with objectives for next week's meeting. We've discussed most of the objectives previously, but a question came up during internal discussion regarding whether a permit limit was required for every facility covered under a variance.

The document also summarizes why we feel our proposed approach to the variance is appropriate with some references to EPA documentation. Please share around to others who will be attending the meeting next week. And let me know if you have any questions before then.

Thanks,

Aron Borok
